

iPhone Sales Analysis Report

Global Sales Performance | January – May 2025

Prepared using Power BI | Data Analytics Project

1. Executive Summary

This report presents an analysis of iPhone sales data spanning January to May 2025. The dataset covers 100 sales transactions across six countries, six iPhone models, and multiple payment methods. The objective of this analysis is to identify sales trends, top-performing products, regional performance, and customer purchasing behavior to support data-driven business decisions.

Key Performance Indicators

Metric	Value
Total Revenue	\$146,875
Total Orders	100
Total Units Sold	333
Average Order Value	\$1,468.75
Analysis Period	January – May 2025
Countries Covered	6

2. Dataset Overview

The dataset contains 100 records and 10 fields capturing key attributes of each sales transaction. Below is a summary of the data structure:

Column	Description	Type
Order_ID	Unique identifier for each transaction	Numeric
Customer_Name	Name of the purchasing customer	Text
Country	Country where the sale occurred	Text
iPhone_Model	Model of iPhone sold	Text

Column	Description	Type
Storage	Storage capacity of the device	Text
Color	Color variant of the device	Text
Quantity	Number of units purchased	Numeric
Price	Sale price of the transaction	Currency
Sale_Date	Date of the transaction	Date
Payment_Method	Method used to complete payment	Text

3. Sales Performance by Country

Sales were recorded across six countries. The United States led in total revenue, closely followed by the United Kingdom. Pakistan recorded the lowest revenue contribution during the period.

Country	Total Revenue	Share (%)
USA	\$33,451	22.8%
UK	\$33,148	22.6%
Canada	\$26,289	17.9%
UAE	\$25,085	17.1%
Germany	\$16,515	11.2%
Pakistan	\$12,387	8.4%

Key observations:

- The USA and UK together account for over 45% of total revenue.
- Emerging markets (UAE and Pakistan) contribute approximately 25% combined.
- Germany shows moderate revenue, suggesting potential for growth in the European market.

4. Sales Performance by iPhone Model

Six iPhone models were included in the analysis. The iPhone 14 Pro generated the highest total revenue, while the iPhone 14 base model recorded the lowest revenue figures.

iPhone Model	Total Revenue	Units Sold
iPhone 14 Pro	\$36,612	66
iPhone 15 Pro Max	\$30,366	73
iPhone 15	\$22,608	57
iPhone 13	\$21,017	59
iPhone 12	\$19,364	42
iPhone 14	\$16,908	36

Key observations:

- The iPhone 14 Pro leads in revenue despite not being the top-selling unit, indicating a higher price per unit.
- The iPhone 15 Pro Max sold the most units (73), making it the most popular model by volume.
- The iPhone 12 and 14 are the older models yet still contribute meaningfully to overall sales, showing continued demand for legacy devices.

5. Monthly Sales Trend

Sales activity was tracked from January through May 2025. January recorded the highest revenue for the period, with a general declining trend observed in subsequent months.

Month	Total Revenue	Trend
January 2025	\$46,129	↑ Peak Month
February 2025	\$28,362	↓ Decline
March 2025	\$39,029	↑ Recovery
April 2025	\$29,559	↓ Decline
May 2025	\$3,796	↓ Partial Data

Key observations:

- January 2025 recorded the highest monthly revenue at \$46,129, possibly driven by post-holiday purchases or product launches.
- March showed a notable recovery, suggesting a seasonal buying pattern.
- May figures are low as the dataset only captures the beginning of the month.

6. Payment Method Analysis

Four payment methods were recorded. Debit card was the most commonly used payment method, accounting for 38% of all transactions.

Payment Method	Number of Orders	Share (%)
Debit Card	38	38%
Credit Card	25	25%
Cash	19	19%
PayPal	18	18%

- Debit card dominance may reflect customer preference for direct bank payments.
- Cash transactions at 19% suggest a significant portion of sales occur in physical or in-person settings.
- Digital payment (PayPal) accounts for 18%, indicating moderate adoption of online payment solutions.

7. Product Preferences: Storage & Color

Storage Capacity

Storage	Orders	Share (%)
256GB	38	38%
128GB	34	34%
512GB	28	28%

Color Preferences

Color	Orders	Share (%)
Blue	25	25%
White	22	22%
Purple	19	19%
Red	19	19%
Black	15	15%

- 256GB is the most preferred storage, balancing price and capacity.

- Blue is the most popular color, followed by White and Purple.
- Black, despite being a classic option, recorded the lowest preference in this dataset.

8. Conclusions & Recommendations

Conclusions

- The USA and UK are the strongest revenue markets and should remain priority regions for sales and marketing efforts.
- The iPhone 14 Pro and iPhone 15 Pro Max are the top-performing models by revenue and volume respectively.
- January and March show strong sales peaks, suggesting seasonal buying behavior worth leveraging in future campaigns.
- Debit card is the dominant payment method, but digital payment adoption is growing.
- 256GB storage and Blue color are the most in-demand product configurations.

Recommendations

- Focus promotional campaigns in January and March to capitalize on peak buying seasons.
- Invest in marketing efforts in Germany and Pakistan to grow underperforming markets.
- Ensure adequate stock of 256GB Blue variants as they are the most preferred configuration.
- Consider expanding PayPal and digital payment options to capture growing online buyers.
- Monitor iPhone 15 Pro Max closely as it leads in unit volume and may overtake the 14 Pro in revenue with a full year of data.

9. Tools Used

Tool	Purpose
Microsoft Power BI Desktop	Data visualization and dashboard creation
Power Query Editor	Data cleaning and transformation
DAX (Data Analysis Expressions)	KPI measures
CSV / Excel	Raw data source format
